SITE MAINTENANCE

If the rain and snow continue, M.I.D. may maintain a higher water level at Modesto Reservoir. Unlike last summer, our dock may be accessible by boat. Unfortunately, not just our dock, but our entire ski site is in bad need of repair. The following work needs to be done before ski season beings:

- 1) DOCK – a) Replace one floatation section under dock b) Remove old carpet and check dock surface and sides for damage c) Make repairs to dock structure and ladder and d) replace carpet
- 2) FLOATING SIGN – Clean, paint and anchor in lake
- 3) 5 MPH BUOYS – Clean, repair decals, check chains and anchor in lake
- 4) BOOMLINE – Make repairs, clean and anchor in lake

- 5) SKI COURSE – Replace all buoys and check for accuracy
- 6) SHORELINE – Clean shoreline of litter

Vice President Kurtis Nelson is in charge of site maintenance. He has set two dates for work details. He will make sure that all of the materials we need will be on stie. The work party dates are Saturday, March 8 and a backup date (in case of bad weather) of Saturday, March 15. The time TBA. Promotions director and JDT Coach Nick Martin, offered us help to complete our “Adopt a Shoreline”. Hughson High has an “Ecology Club” that has volunteered to clean up our ski site. They did a great job. We just need to provide plastic bags and some supervision. However, if you want to help and you are not into swimming in the lake mounting anchors, or making dock repairs, then you can volunteer to pick up litter. Bring waterproof shoes, extra socks, gloves, hat and plastic bags.

It’s not “our ski site” like a private lake would be, however, we use it most of the time, so let’s help maintain it.

Credit for “Dues Work down Option” will be given to those who work over one-half of each day!
